IX-th Edition

May 31st – June 2nd 2013, Suceava

Symposium Theme:

Geographic Space Organization from an Environmental Point of View

Why Bukowina?

For geographers and other actors involved in geographical space organization as well, the Bucovina area represents an entity marked by the contradiction between the rich and varied natural and cultural potential on the one hand and the recent negative impact brought about by the aggressive actions upon the forestry fund or by the territorial spreading of new-type buildings on the other hand.

Under these circumstances we invite you to an open debate meant to identify the territorial tensions and to propose solutions for the present situation.

Last but not least we intend to find a way to try to avoid such realities in the future.
